## 10 Things to Know About Stem Cell Therapy in San Antonio (210) 202-4030

### 10 Things to know

5. Current treatments do NOT use Embryonic Stem Cells

- The use of adult stem cells in research and therapy is less controversial than ES cells, because their production does not require the destruction of an embryo.
- Amniotic fluid stem cells are intermediate between embryonic stem cells and adult stem cells. They have some potential to develop into different cell types but they are not pluripotent.
